RECOMMENDED BOOKING TIMES

We have created this guide to help you with re-booking your appointments for your favourite services! We understand that everyone is different, and some people's nails grow faster than others, so we have designed this guide to create an average amount of time.

GEL POLISH MANICURE

# Nails

We recommend a removal and reapplication of this service anywhere between 14-28 days. Gel polish manicures can go a little longer than Nail Extension treatments due to the fact they are applied to your natural nail directly. We would encourage you to have your maintenance appointment booked for the point where your Mani is just starting to 'chip' 'crease' or 'snag.'

BIAB MANICURE

Nails

AKA - Builder in a Bottle, or Extra Strength Gel polish Mani.

Again, we recommend a removal and reapplication of this service anywhere between 14-28 days. These manicures can go a little longer than Nail Extension treatments due to the fact they are applied to your natural nail directly. We would encourage you to have your maintenance appointment booked for the point where your Mani is just starting to 'chip' 'crease' or 'snag.'

Here at Nailco there are two main types of Nail Extensions or (Nail Enhancements as they are sometimes known) available for you to book. These are Acrylic Nail Extensions and Hard Gel Extensions. They both look the same and have the same finish, but are made of different substances.

If you'd like find out more about how they differ, head to our Instagram highlights where you'll find a 'Gel Extension' highlight. You'll find us here @nailconailbar.

When it comes to maintenance however, the same guidance applies to both.

# Nails

Infills can be your saving grace when it comes to keeping your nails looking fresh! The process involves 'infilling' the exposed natural nail by the application of your chosen product between your cuticle area and the bottom of your original Nail Extensions. You can then paint over the entire nail, change your colour and (in some circumstances) shape to give the look of a brand new set without any removal process.

We recommend this process anywhere between 14-21 days. Again this is dependent on your personal nail growth, however; due to the nature of Nail Extensions and the risks involved if they are not maintained properly, we cannot carry out an infill after 21 days.

# Nails

All is not lost however! We are happy to carry out a Rebalance service for you anywhere between 21-28 days! A Rebalance focuses on restoring the structure of your extensions by placing the apex back where it should be to ensure the security of the extension! Then, similarly to an infill, product is used to fill the gap between your cuticle area and your original nail extension. This can then be repainted meaning you can change your colour and (in some circumstances) shape, to give the look of a brand new set without any removal process. Unfortunately we cannot carry out a re-balance after 28 days of your original application.

TIME FOR A FRESH SET!

# Nails

If you have had your original Nail Extensions for more than 28 days, we will not be able to infill or rebalance this set, and it will be time for a removal and a fresh set!!! (Is there a better feeling? We think not!)

Please ensure you book in a removal as well as your reapplication treatment of choice, plus any nail art you'd like, to ensure that we have enough time allocated to give you a perfect new set!

Please be aware that you do not HAVE to have an infill or rebalance. You could come for a full removal and fresh set every three weeks if you wanted to, but from a financial point of view, as well as a minimising your exposure to a variety of products point of view, its what we recommend!

We highly recommend that you have your nail products removed in a salon. Preferably the same salon where they were applied. The reason for this is because not all acrylic or gel systems contain the same components. If a client comes to us from another salon needing a removal, we can't be sure which product has been used. This makes it very difficult for us to safely advice which removal process is best for you. If this is the case, we would recommend you have them removed there, then come to us for your reapplication / set. If that isn't possible, please get in touch and we can discuss options as we'd love to have you!
