IBX

STRENGTH AND CONDITIONING TREATMENT

This treatment is used to improve nail plate integrity under any Gel Polish coating by fusing together the top layers of your nail. It is also used to target natural nail imperfections and weaknesses that prevent natural nails from growing long. Although this treatment targets weak or damaged nails, it is also highly recommended for the maintenance and care of strong and healthy nail plates and to protect your nails from over exposure to any other products.

IBX INITIAL APPLICATION	£10
This is the first step to keeping your natural nails strong and healthy. This treatment can be applied before the application of gel polish, or alone on your natural nails.	
IBX TOP-UP	£5
This treatment is recommended at the start of your next treatment for guaranteed natural nail improvement. It works successfully with Nail Polish, Gel Polish and Extensions and ensures your natural nails remain strong and healthy.	

Repairs

We operate a 7 day repair policy meaning we will carry out any repairs that we consider are as a result of our workmanship without charge. Anything after 7 days will result in a small fee per nail. Please be aware that our diaries are super busy so you will need to book an appointment for a repair. If you look online and there is no availability just call us. We promise we'll get you in!
